

## Modernization Kit No. 4750210 New Hot Hydro Window Kit

### Features:

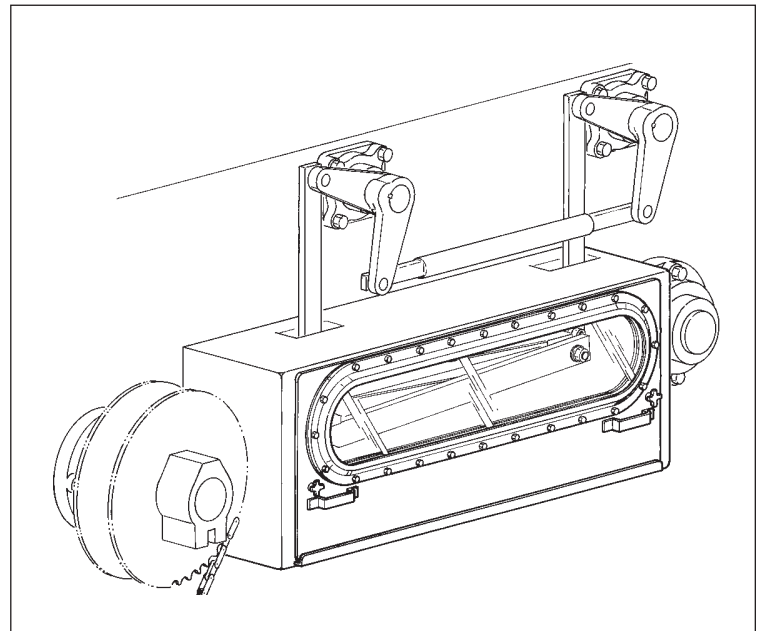

- Incorporates a stainless steel frame
- Durable
- Crack and break resistant

Barry-Wehmiller now offers our newly designed hot hydro window assembly to retrofit your existing Bottle Cleaner.

The new design incorporates a stainless steel frame that houses and reinforces the inspection window. Because the window is encased, it is less likely to crack or break. The rigid construction of the framework assures a long-lasting window unit and facilitates maintenance of the components within.

Please contact your Barry-Wehmiller Customer Service Department for details.
