

Modernization Kit No. 4750502 Grate Bed Conversion

Barry-Wehmiller now offers a grate strip conversion from 7/8" grate strip centers to 1/2" or 11/16" centers. The smaller separation between grate strips provides added container stability and better conveying control. Containers are moved along the pasteurizer bed more smoothly with less possibility of falling. The smaller distance between strips also allows for the effective processing of containers with smaller diameters.

The conversion package includes the following components:

- All Necessary Grate Strips.
- One on One Stripper Castings with Angles.
- Comb Strips
- Connectors
- All the necessary drawings and instructions for installation.

Please contact your Barry-Wehmiller Customer Service Department for details.
