

Modernization Kit No. 4750313
Swing-Out Window Adaptor Kit

A Swing-Out Window Adaptor Kit for improved visual inspection has been developed to upgrade existing oval pasteurizer windows. The Swing-Out feature allows easy access to the interior of a pasteurizer during operation. Problems that affect the quality of the pasteurization process can be found quickly and corrected.

Each Swing-Out Window Adaptor Kit replaces one window and it is suggested that an entire pasteurizer be converted at the same time. This feature is also available as a production option on new pasteurizers.

These window kits can be mounted on any flat surface with a 6" diameter hole and bolt holes (no welding).
